EXPERIENCE

Woven Planet North America
Senior Software Engineer *Jul 2021 – present*
- Leading the ML EDGE COMPUTE team of 4 engineers, tasked with deployment of deep learning models across the autonomy stack on the compute platform. This includes architecture fine-tuning, quantization, and latency optimization. The team is also partnering with the hardware and ML platform teams to bring up an automated pipeline for validation, testing, and executing deep learning models on the edge.
- Designed and developed a long-range vision-based 3D detection model. Set up a playback system to feed vehicle data into the perception service that is used for visualization, data curation, validation, and simulation.

Lyft Level 5
Software Engineer *May 2021 – Jul 2021*
- Proposed and developed a new free space prediction model in the perception stack that improved upon the previous static obstacle prediction model. Set up an annotation pipeline for bird's-eye-view free space and map elements prediction.
- Continued the role at Woven Planet after the acquisition of Lyft Level 5 in Jul 2021.

Meta Reality Labs
Research Intern *Aug 2020 – Nov 2020*
- Researched and developed a deep learning method for high-fidelity 3D eye segmentation using implicit neural representations. Curated and experimented on both synthetic and real datasets which showed highly accurate segmentation results on a wide range of pupil positions.

Lyft Level 5
Software Engineering Intern *Feb 2020 – Jun 2020*
- Improved the performance of LiDAR-based large-vehicle detection model by curating a new training dataset with additional samples and implementing a new heading loss function. Later on, led the migration effort of the detection code base from Tensorflow to PyTorch.

EDUCATION

Singapore University of Technology and Design (SUTD)
Ph.D. in Computer Science *2016 – 2020*
- Advisors: Dr. Sai-Kit Yeung and Dr. Gemma Roig
- Thesis: Data-driven 3D scene understanding
- SUTD President's Graduate Fellowship

Vietnam National University - Ho Chi Minh City University of Science
B.S. in Computer Science *2010 – 2014*
- Summa cum laude
